3.4 Professional Certificate Requirement

3.4.1 Examinations and certificates conducted and issued by the Securities Association of China.

3.4.2 Securities Qualification Certificate, Funds Qualification Certificate, Futures Qualification

Certificate.

3.5 Suitable Posts

3.5.1 Investment and financing posts of financial institutions and enterprises, financial reporters and editors of the media industry.

4. Schooling System

Four-year undergraduate education

5. Duration

Generally four years. The shortest duration is not less than three years, and the longest is not more than six years.

6. Graduation and Academic Degree Awarding

Minimum Credits of Curriculum (required courses, practical trainings & extracurricular classes): 149.

Degree Awarded: Bachelor of Economics

7. Major Disciplines

Applied Economics, Theoretical Economics

8. Core Courses

8.1 Western Economics 64 course hours

Western Economics is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to help the students understand the role of market mechanisms, master basic analytical methods in economics, understand the causal relationship of microeconomic activities, have the ability to preliminarily analyze an economic entity's behaviors and the market, and lay a good foundation for the study of other professional courses or further study. The main course contents include law of supply and demand, theory of consumer's behavior (utility theory), theory of the firm, theory of market structure, and theory of production factors, Pareto Optimality conditions, market failure and role of the government.

8.2 Accounting Principles 48 course hours

Accounting Principles is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to help the students acquire basic accounting knowledge through learning of accounting principles. The main course contents include basic principles of financial accounting, composition of manual recording system, basic operation procedures of the system, basic management methods and basic accounting skills. Besides, the course also introduces the overview of financial accounting, double-entry bookkeeping, account setting, filling and approval of accounting documents, book registration, trial balancing, adjusting and reversal, property check, brief introduction of financial statement, procedure and organization of accounting calculation.

8.3 Management 48 course hours

Management is a specialized basic course of the program of Finance and a course of unified examination of the college. The teaching objective of this course is to help the students systematically master the basic concept, theory and method of management through learning and improve their ability of learning, research and management knowledge application. The main course contents include the generation and development of management theory, organizational environment, and basic functions of management.

8.4 Finance 48 course hours

Finance is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to train the students to systematically understand and master the basic concepts and basic theories of currency, credit, bank, financial market and financial macro-control. They will master the operation mechanism of currency and financial system and the mutual relation between financial operation and economic operation. The students are required be able to use relevant knowledge to independently analyze and solve the new problems, new policies and development trend in international and domestic money and banking at present, improve the ability to understand and grasp the economic and financial laws, and lay necessary foundation for further study of other specialized knowledge. The main contents include currency, currency system, credit, interest and interest rate, financial market and system of financial institutions, commercial bank and central bank, theory of money supply and demand and inflation.

8.5 Investment Portfolio Management 48 course hours

Master investment portfolio skills, avoid material risks in investment activities, and make investment activities develop healthily. This course is a Required course of the program. The main task of this course is to make students master the basic principles of investment portfolio, learn to analyze the operation law of financial market, understand and assurance the investment behaviors in market economy, cultivate their professional theoretical literacy and improve their practice, analysis and application ability in respect of investment portfolio.

The main contents include: the basic components of investment portfolio decision making, Markovvitz asset portfolio theory, inter-temporal asset portfolio investment, decision maker behaviors in portfolio, securities analysis and management, etc; decision making on optimal risk asset portfolio; investment portfolio evaluation methods.

8.6 International Finance 48 course hours

International Finance is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to help the students systematically understand and master the basic theories and basic policies of international finance and the preliminary knowledge of international financial market and lay a solid foundation for carrying out international economic transaction and engaging in international financial management in the future. The course contents mainly include: (1) international expenses and receipts; (2) foreign exchange and exchange rate; (3) foreign exchange risks and their management; (4) international reserves; (5) international monetary system; (6) international financial market; (7) foreign exchange transactions; (8) international capital flow; (9) international financial integration and

European monetary union; (10) international debt.

8.7 Econometrics 48 course hours

Econometrics is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to help the students master basic theories and main model specification methods of econometrics and get familiar with the basic contents and working procedure of econometric analysis. They will be able to use econometric software for practical operation, build and apply simple econometric models, use quantitative analysis technique for empirical analysis of social and economic problems in reality, and take it as an effective tool in theoretical and practical studies on their posts. The course contents mainly include the following parts. Part I introduces the function of econometric analysis course in the development of economic disciplines and practical economic work. Part II introduces the basic theories and methods of classic econometrics, as well as the extension and new development of the theories and methods of econometrics. Part III introduces the simple application of econometric models and conducts practical analysis on the quantitative relation in practical economic understanding. The core knowledge points involved include the theory and method of single-equation econometric model, expanded theory and method of single-equation econometric model, the theory and method of simultaneous equation econometric model, applied single-equation econometric model and macro-econometric model.

8.8 Applied Statistics 48 course hours

Applied Statistics is a specialized basic course of the program of Investment and a Required course for the degree. The teaching objective of this course is to help the students master basic principles and methods of statistics, explain and use common statistical indicators correctly, and improve their ability to collect and process statistic data. They will acquire the ability to solve practical problems in economic management with quantitative analysis methods and make statistical analysis on practical problems with EXCEL or SPSS statistical analysis software skillfully. The main course contents include brief introduction, collection and sorting of statistic documents, description of statistic document, basic inference theory, parameter estimation, hypothetic test, variance analysis, regression analysis, time-series analysis and indicators.

8.9 Financial Statement Analysis 32 course hours

Financial Statement Analysis is a specialized Required course. Financial report is an important product in accounting system. It is widely used in various commercial decision. The administrators in businesses supervise and manage business performances, communicate with investors, make decisions, evaluate and realize acquisition in accordance with the financial reports. Securities analysts use the financial reports to assess a company's value. Commercial banks use it to decide whether to issue a loan. Investment banks use it for issuing pricing and analysis of acquisition. Consultant companies use it to help customers with competitive analysis. This course will introduce the basic framework of business analysis based on financial reports, various kinds of analysis tools, and how to apply these tools to different kinds of commercial decisions.

8.10 Corporate Finance 48 course hours

As a professional course, Corporate Finance is a Required course for the degree. The teaching

objective of this course is to help the students master the financial decision-making theories related to corporate funds movement, including the knowledge in financing management, investment management, assets management, financial budget, financial analysis and control and dividend decision, and acquire certain basic ability to carry out corporate financing activities according to the accounting and other relevant information. The teaching should emphasize the training of basic skills of the students, to comply with the cultivation objectives of applied talents and to lay a foundation and provide necessary tools and methods for learning subsequent courses and professional courses.

9. Practical Training

The program carries out practical teaching of professional knowledge and professional foundation in terms of sub-industries of economics, management, accounting and finance inside and outside the campus from Grade 2, including practical teaching activities in relevant enterprises and financial institutions for on-site cognition and learning. On this basis, the program will arrange the students to further complete the "going out" practical session for the cultivation of professional comprehensive ability. The writing of the academic thesis and the professional internship in relevant financial institutions and enterprises of the program start from the end of the first term of Grade 4.

Main practice bases:

- (1) On-campus laboratory (including laboratories for public use, financial affairs, applied economics and other uses).
- (2) Off-campus practice bases: FX168 Group, Orient Securities, Hua Chuang Securities, Wurui Nonferrous Metals Group, Shu Lun Pan CPAs, Sinotrust, Shenzhen Development Bank and some commercial banks.

*1. Guidance for selective modules of professional course and practical training:

There are different modules for professional course to be selected according to different ability requirements, students must select one module to learn and achieve the credits required by the module. The selective modules of practice training must be selected according to the corresponding module of professional course.

Module A: Module of industrial investment

Module B: Module of financial investment

Module C: Module of investment expansion

2. Professional Certificates can be gained after learning following courses:

The integration of academic certificates and professional qualification certificates is adopted in order to encourage students to take the industry-accepted qualification examinations. Students may apply for the exemption of "Practice of International Financial Market" course (Summer Semester 3) after obtaining the Certificate of Qualification in Securities Industry; and may apply for the exemption of "Alternative Investment" course (Summer Semester 3) after obtaining the Certificate of Qualification in Securities, Investment and Fund Management or the Certificate of Qualification in Futures.

12. Schedule for Semesters (Suggested)

Autumn Semester 1:
