

Japanese Language and Literature

(Grade 2024)

Course code: 050207

I. Cultivation Objectives

1. General cultivation objective

Based on the ideology and general orientation of Shanghai Polytechnic University, the actual needs of the society and the conditions of the program, this program of Japanese Language and Literature focuses on cultivating application-oriented intercultural communication talents with an international perspective, a healthy personality, good humanistic and professional qualities, certain thinking and discernment skills, proficiency in Japanese, basic skills for business activities, and the ability to adapt to the development of Shanghai's modern industrial system.

2. Objective of value guidance

This program will guide students to correctly view the cultural differences between China and Japan, to understand Japanese culture on the basis of Chinese culture, to enhance cultural self-confidence, and thus to inspire patriotism and establish socialist ideals with Chinese characteristics; will cultivate students' professionalism and ethics, emphasize the necessity for foreign language practitioners to maintain a firm political stance, correctly understand historical issues, and effectively tell the story of China..

3. Five years after graduation, students in this program should achieve the following objectives:

Have the ability to complete further studies in a related field or across disciplines (including, but not limited to, a master's degree from a domestic or international institution of higher learning) based on the body of knowledge studied at undergraduate level.

Have the ability to work well and independently in the practical work, with certain ability or potential for promotion based on the body of knowledge studied at undergraduate level.

II. Graduation requirements

1. Morality and Ethics

1-1 Students should love the socialist motherland, support the leadership of the Communist Party of China, have Chinese sentiments and an international perspective, establish ambitious ideals, have the ambition to serve the motherland, and unite ideals and pursuits with the Chinese dream.

1-2 Actively practise the core values of socialism, have a correct perspective on world, life and values, possess good social and professional ethics, and consciously maintain and pass on traditional Chinese culture and virtues.

1-3 Develop a global Consciousness, broaden international perspectives and possess good interpersonal communication skills and teamwork spirit.

2. Professional knowledge

2-1 Professional Knowledge of Japanese

2-2 Basic Knowledge of International Business and Trade

2-3 Knowledge of Chinese cultural dissemination and cross-cultural communication between China and Japan

2-4 Understanding of professional background and industry dynamics

3. Ability to innovate

3-1 Students should actively enroll in natural science and technology-related courses within general education, public basic courses, and major-specific courses to understand the laws of natural science and the role of technological development in social progress.

3-2 Students should select engineering courses or enroll in micro-programs to develop logical thinking, gain an understanding of the current development status of modern technologies such as artificial intelligence, learn to respect facts and Judging scientifically, and adopt an interdisciplinary mode of thinking that integrates the humanities and sciences.

3-3 Students should actively participate in innovation projects and dual-creation programs to develop a sense of innovation and be able to synthesize existing knowledge and experience to develop ideas, explore methods and solve problems.

4. Ability to use knowledge

4-1 Master basic language skills in Japanese listening, speaking, reading, writing and translation. Specifically, students should be able to understand the information, opinions and emotions conveyed by spoken and written Japanese, to respond appropriately, and to pay attention to the accuracy and appropriateness of spoken and written expressions.

4-2 Be able to read and understand scientific and technical literature with the aid of language tools and relevant resources.

4-3 Have competent in general day-to-day translation between Japanese and Chinese.

4-4 Be able to carry out simple translations of scientific and technical texts with the aid of tools and relevant resources.

5. Ability to use Information

5-1 Be able to use online dictionaries, electronic dictionaries, etc. for learning of Japanese knowledge.

5-2 Make appropriate use of website resources for learning of Japanese knowledge and extension of knowledge.

5-3 Be able to complete the graduation thesis with the help of database resources.

6. Communication and expression

6-1 Become aware of the diversity of the world through language learning and to be open to multicultural phenomena.

6-2 Develop cultural confidence through language learning and be able to consciously maintain and pass on traditional Chinese culture in cross-cultural interactions.

6-3 Master basic intercultural communication skills, be able to correctly understand and deal with cultural differences between China and Japan, and be able to help people from different cultural backgrounds in China and Japan to communicate effectively across cultures.

7. Teamwork

7-1 Students should be able to apply the knowledge and skills acquired to complete tasks and solve practical problems in business practice in a variety of contexts.

7-2 Be able to learn to work in teams through practical activities and internship.

8. International Perspectives

8-1 Develop a sense of globalization and broaden international perspectives in the process of learning Japanese with an eye to the world situation, Asian development, and Sino-Japanese exchanges.

8-2 Keep abreast of international developments and globalization issues.

8-3 learn to understand and respect the differences and diversity of different cultures as part of their knowledge of Japanese.

8-4 Commitment to applying knowledge of Japanese to promote intercultural communication.

9. Learning and Development

9-1 Students should have the ability to learn independently, to improve themselves and to acquire new knowledge.

9-2 Be able to expand the breadth and depth of learning outside the classroom based on in-class learning and to understand information related to developed Japanese industries such as technology, machinery, energy and chemicals.

9-3 Make good use of tools and online resources for independent learning based on individual needs.

III. Schooling System

Four years.

IV. Length of Study

Flexible study period, generally four years, the minimum length of flexibility is not less than three years, the longest not more than six years.

V. Requirements for Graduation and Degree Conferring

To graduate, students must complete the minimum number of credits required by the Instructive Cultivation Plan for each category of study and all the content required by the Extracurricular Class, with a total of 157 credits, and a Bachelor of Economics degree if they meet the requirements for the award of a Bachelor of Arts Degree.

VI. Discipline

Foreign Languages and Literature.

VII. Core Courses

Basic Japanese (I, II, III, IV), Advanced Japanese (I, II), Japanese Reading (I, II), Japanese Conversation (I, II, III), Japanese Interpreting Practice (I, II, III).

VIII. Course Structure and Course Hours (excluding Extracurricular Class)

1. Description of Selective Course

In addition to the required courses, a certain number of selective courses are set up in both professional courses and professional practice courses, of which a total of 6 credits should be taken in professional courses and a total of 4 credits in professional practice courses. Thees two main categories of courses include the following:

(1)Science and Technology Courses

These courses are designed to meet the demand for applied Japanese language talents in the development of Shanghai's modern industrial system. They aim to enable students to understand modern technological advancements such as artificial intelligence and future energy, learn to respect facts and make scientific judgments, cultivate an interdisciplinary way of thinking that integrates arts and sciences, and acquire the ability to read and translate scientific and technological literature with the help of language reference books and relevant resources.

(2)Cultural Courses

These courses focus on the cultivation and experience of students' cultural literacy and aim to increase the depth of thought and improve critical thinking skills. On the one hand, it lays the foundation for further academic study, and on the other hand, the study and experience of Japanese culture contributes to the understanding of the cultural differences between China and Japan and facilitates the development of cross-cultural communication skills.

2. Explanation of the relevance of vocational qualifications and competition awards to courses.

Students who have passed the Introductory Japanese Business Bookkeeping course will be able to sit for the vocational qualification related to this subject: “Bookkeeping Competency Test Level 3”.

Students who have obtained a Certificate of Proficiency in Bookkeeping Level 3 or higher, a Certificate of Full Scripture Etiquette, and a Certificate of Japanese Interpretation are eligible to apply for exemptions and credits for the Introduction to Japanese Business Bookkeeping, Business Etiquette and Communication, and Japanese Interpretation Practice I or J apanese Interpretation Practice II courses.

Students who have won a third prize or higher (including the third prize) in a Japanese speech competition at municipal level or above may apply for exemption from the Japanese Speech and Debate course and receive the corresponding credit.

Students who have won a third prize or higher (including the third prize) in a Japanese writing competition at municipal level or above may apply for exemption from the Japanese Writing Practice course and receive the corresponding credit.

X. Prerequisite for Course Study

Through taking extracurricular classes, students are encouraged to take part in academic lectures, social practice activities, campus cultural and sports activities, innovative and entrepreneurial activities, voluntary activities, etc. to improve their social adaptability and enhance the competitiveness in the job market. Details are specified in Students' Manual.

Notes:

The strength of a course's support for graduation requirements is indicated by “H/high, M/medium, L/weak”;

Strength of support is defined as the extent to which the course covers the graduation requirement indicator points, with H covering at least 80%, M at least 50%, and L at least 30%.
